Press Note.

CURTAILMENT OF POWER SUPPLY.

The Chief Electrical Engineer in Mysore has notified to power consumers informing them that the slight improvement in the supply of water that appeared in the Cauvery Valley during last week has not been kept up and that, unfortunately, there have been no rains during the whole of the last week with the result that the increased flow has dwindled and the condition is worsening day by day. He has stated that with the available water in the river, it is not possible to generate enough power at Sivasamudram and Shimsha to meet all the demand. He is therefore compelled to re-introduce curtailment in the supply of power to all industrial concerns. He has requested them kindly to arrange to effect, during this week, a 50 per cent cut in the consumption of energy based on the normal consumption during March. Smaller installations who have no meter will be disconnected on alternate days as was being done about two weeks back. The present curtailment will come into effect from the midnight of the 22nd May 1950.

The difficulty to be experienced by power consumers due to this curtailment is appreciated, but it is due to causes beyond the control of the Electrical Department. It is requested that the consumers of power will kindly extend their co-operation in effecting this cut, so that with the available power the essential services may be maintained and the remaining distributed equitably among all the consumers.
